

Laboratory work #1

Academic year 2022/2023, autumn semester

Course: **Algorithmization and Programming of Solutions (DIP107)**, Part I

Group work (three students in the group)

1. Decompose a program using the top-down approach into functions and subfunctions, i.e., **create an organizational chart**.

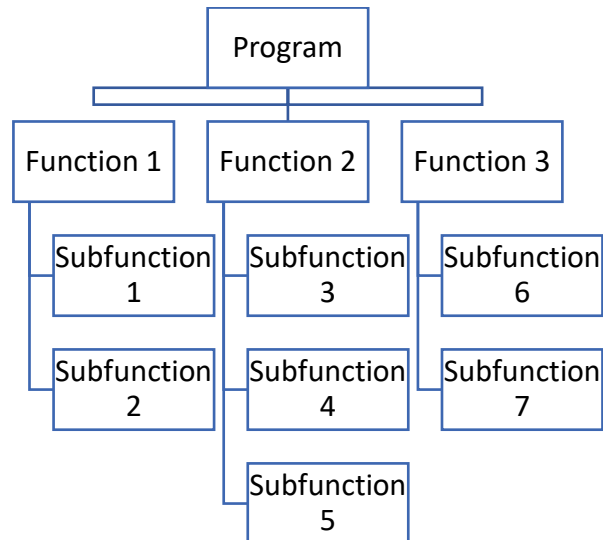

Figure 1. A general example of an organizational chart

2. Chose three subfunctions and **for each of them create a flowchart** that defines all actions, which should be performed to complete a subfunction. Minimum number of graphical elements (start, end, input, output, actions) in each flowchart is 10.

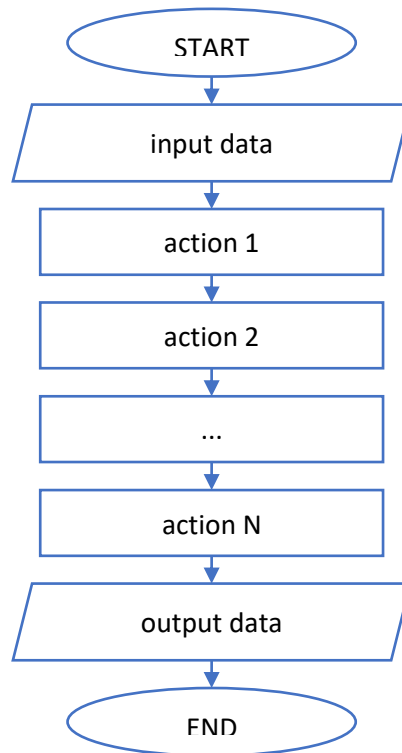

Figure 2. A general example of a flowchart

Variants

group #	Topic
1. and 6.	A program for an e-shop that sells books
2. and 7.	A program for a library
3. and 8.	A register and mark book for a teacher
4. and 9.	An electronic calendar for a student
5. and 0.	A program for online knowledge assessment
